DATE	21/2/2023

SCOPE OF WORK

What does the project entail? What are the delivery methods?

In our project We are trying to simulate e-learning platforms. It will contain the principals of an educational website, like: courses, students, categories, videos, comments and so on.
We will start with the database architecture because it's important to know what we are going to do. We will design tables for every element in the project and the relation between tables. (Ex: courses table will have relation of type ONE TO MANY with the videos table, videos will have relation of type ONE TO MANY and so on…

EXCLUSIONS

After finishing the project, the customer will be able to buy the suitable courses for him, watch lectures and type comments.

On the other hand, Admin will be able to create courses, lectures and see customers reviews

MILESTONES

DELIVERY DATE	TASK	SERVICES REQUIRED
28/02/2023	Form Project Team / Preliminary Review / Scope	
15/03/2023	Analysis Phase	
09/05/2023	Working Phase	
23/05/2023	Project Summary Report and Close Out	

STAKEHOLDERS

ID NUMBER	NAME	ROLE / RESPONSIBILITY
20812018100410	هادي ابراهيم محمد إبراهيم	Project Manager
20812018200899	مريم محمود السيد عبد الله عيسي	Team Leader – Database
